

Planet Duckweed

Creating a new Graduate Student Organization (GSO)

Recruiting interested graduate students

(officers or members) in these areas of study:

Engineering

Multimedia

Business

Environmental Science

Statistics

Economics

Nutrition/Food Science

Global Public Health

Urban Planning

Social Work

Public Relations

Hydroponics

Purpose: Create an interactive team of graduate students with diverse skillsets that will develop and realize practical products from duckweeds to benefit our planet through sustainable technologies.

Current Project: To develop, optimize and deploy a scalable system for producing and harvesting a small aquatic plant (duckweed) that has proven potential as a renewable and environmentally sustainable form of food/feed/fuel.

(project located in Foran Hall, Cook/Douglass campus)

If interested in being part of this new grad student organization and involved in an effort that can be an agent of change worldwide, please contact
