

New Undergraduate Course “Modeling of Watershed Hydrology and Climate Change” for Spring 2022

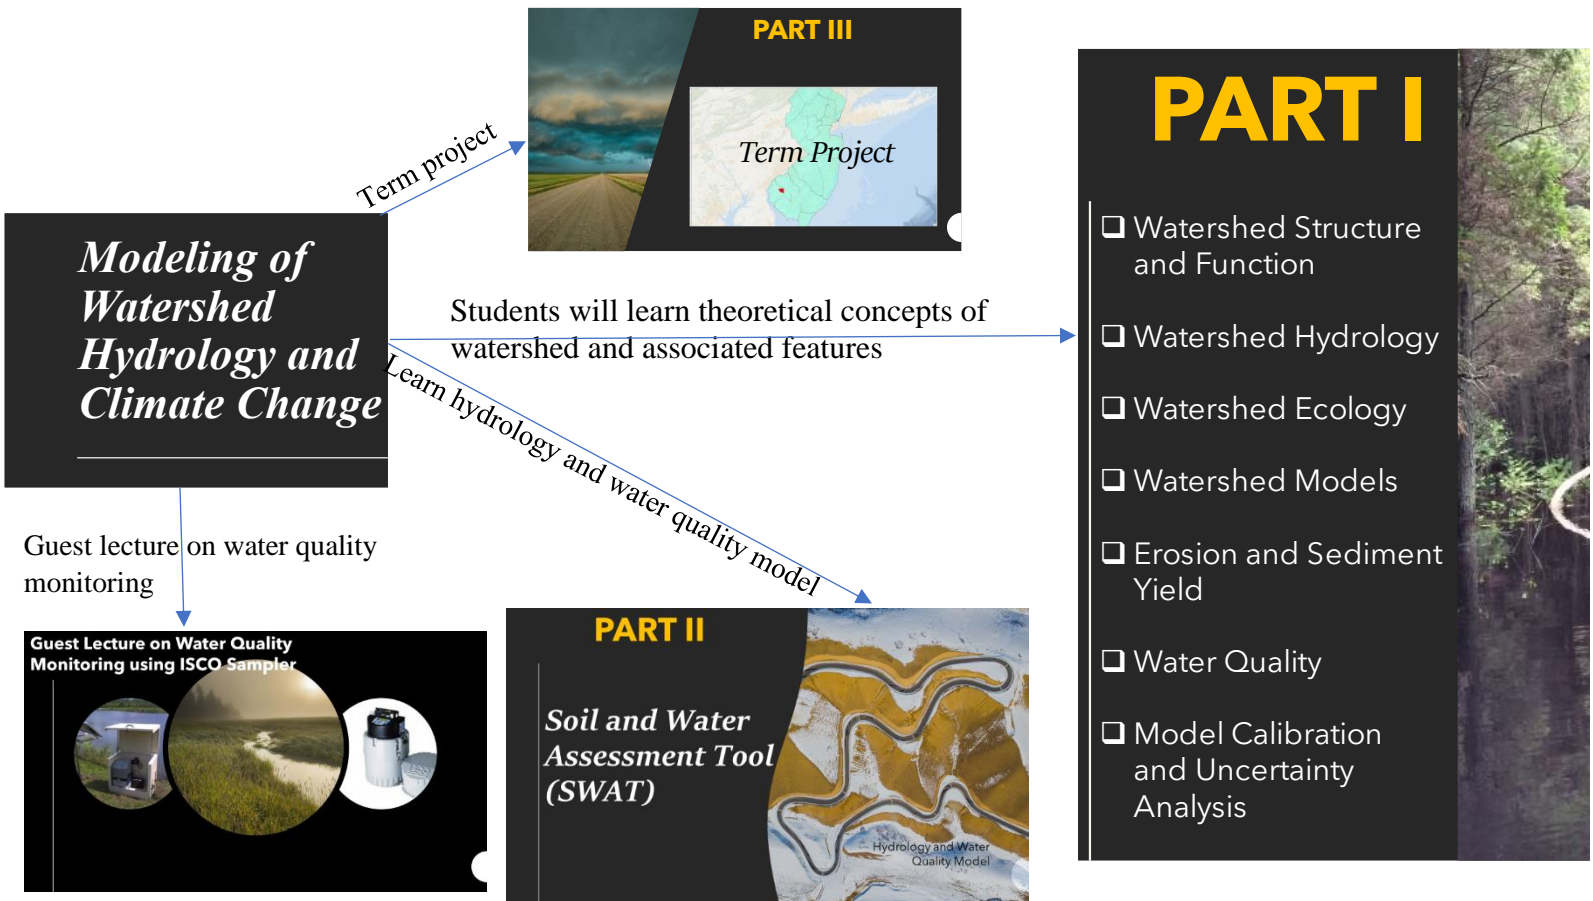

Modeling of Watershed Hydrology and Climate Change

January 19-May 6, 2022

Register as a Spring 2022 course (3 credits)	
Course number:	11:216:407:01
Title:	Special Topics in Ecology, Evolution, And Natural Resources
Subtitle:	Modeling of Watershed Hydrology & Climate
Prerequisite:	Working knowledge in GIS
Class meets:	Wed 10.20-11.40 AM & Fri 3.50-5.10 PM

- *Modeling of Watershed Hydrology and Climate Change* is a cutting-edge computer modeling course to solve real world problems related to hydrology, water quality, and ecology both in current and future climatic conditions.
