Minoring in Sustainability

What is sustainability and what is its purpose? How is it measured? How can communities, businesses, and societies improve their sustainability? Is it possible to “be” sustainable? Our minor in sustainability will answer these questions.

Courses in the minor include: Introduction to Sustainability, Practicum in Sustainability, Sustainability Decision Tools, Controversies in Sustainability, and a selection of courses in systems, governance and socio-economics.

Open to students in any curriculum. The list of course requirements (21 credits) can be found here:
